Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 11-18 and 22-52 are rejected under 35 U.S.C. 102(e) as being anticipated by Anderson et al. U.S. Patent No. 5,735,844.

Anderson et al. teaches a device for hair removal in Figure 10B, wherein an optical fiber, 114, is used to deliver laser energy, and a skin coolant element is provided by line, 118, in which a coolant is used. As illustrated in Fig. 10 of Anderson et al., a recessed window is regarded as slot, 110. Also, the window is laterally offset from the cooling surface wherein an air gap is disposed between the window and the top portion of patients' skin. Further, according to Col. 4, lines 39-59, laser parameters such as pulse duration and intensity or pulse amplitude can be adjustably controlled.

As to claims 30-32, Table 1 of Anderson et al. teaches the recited parameters of the treatment device.

Allowable Subject Matter

Claims 19-21 and 53-55 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
